1. You must upload your project to the "תיבת הגשה לפרויקט סיום" in the "פרקי לימוד" **no later than 2 days before the defense.**

2. The defense of your project will be not later than 01.10.21 **(your Lab teacher will announce it).**

3. The project should be archived as a single ZIP file.

4. The file name should include ID number of the developers, e.g. "12345678_87654321_project.**zip**"

   a) Student with ID 12345678 submits it in MOODLE.

   b) Student with ID 87654321 submits _an empty text file_ "87654321_12345678_project.**TXT**"
   The file name starts with student's ID in both cases.

   If the project was developed by a single student, then the file looks like: "12345678_project.**zip**"

5. Clear your project's folder as follows before making the ZIP file (this explanation relates to project developed in Visual Studio 2019, Windows 10 64-bit OS):

a) Make a reserve copy of your project in a different folder.
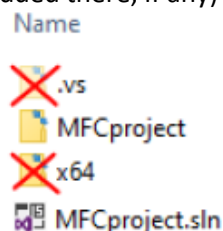

Case A: The project was created from scratch.

   b) **CLEAN** the BLUE folders (leave only the image files you manually added there, if any)

| Name	Date modified	Type	Size
.vs	8/30/2021 10:41 AM	File folder	
Debug	8/30/2021 10:39 AM	File folder

targetver.h	8/30/2021 10:22 AM	C/C++ Header	1 KB

   b) Select all items and create the ZIP file.

**Case B:** You project based on the example from lectures.

   b) **CLEAN** folders ".vs" and "x64" in your project's folder (leave only the image files you manually added there, if any)

Name

.vs
MFCproject
x64
MFCproject.sln

c) Enter the folder of your project, say, "MFCproject" and **CLEAN** there the folder "x64" (leave only the image files you manually added there, if any)

res

~~x64~~

EllipseF.cpp

EllipseF.h

Figure.cpp

Figure.h

MFCproject.aps

MFCproject.cpp

MFCproject.h

MFCproject.rc

MFCproject.vcxproj

MFCproject.vcxproj.filters

MFCproject.vcxproj.user

MFCprojectDlg.cpp

MFCprojectDlg.h

RectangleF.cpp

RectangleF.h

resource.h

stdafx.cpp

stdafx.h

targetver.h

d) Go back to the project's folder:

MFCproject

MFCproject.sln

e) Select both items and create the ZIP file.
